

Flax Seed Oil

Flax Seed Oil contains over 60% Omega 3 essential fatty acids, which are commonly deficient in many modern processed and home cooked pet foods - because Omega 3 fats are easily destroyed by heat and processing. Supplementing with Flax Seed Oil will produce an exceptional natural shine in the coat and reduce "doggy" odour. It can minimise general itchiness caused by Omega 3 deficiency.

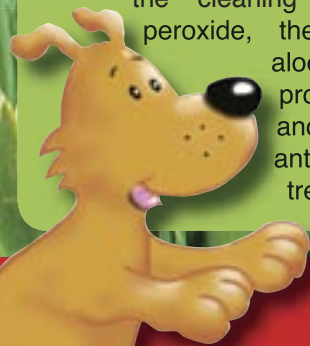

Health Booster

The canine-feline Health Booster is designed to complement and fortify home made or processed pet foods with regard to essential vitamins, minerals, trace elements, and antioxidants.

It contains all natural ingredients including calcium, yeast, kelp, lecithin, wheat grass, grape seed extract, green tea, milk thistle and vitamin C, and it is particularly beneficial for young growing animals, older pets, or pets recovering from illness or surgery.

Ear Cleaner

The Ear Cleaner is Dr Syme's favourite all purpose ear cleaning solution. It combines the cleaning effects of hydrogen peroxide, the soothing nature of aloe vera, the astringent properties of sea minerals, and the antibacterial and anti fungal elements of tea tree oil.

Dermal Ointment

The Dermal Ointment is an excellent all purpose topical skin ointment. Dr Syme routinely uses it on all types of abrasions, hot spots, rashes and wounds. It contains Aloe Vera, Tea tree, Lavender, Evening Primrose, Jojoba, vitamins A and E, and more.

Wound Spray

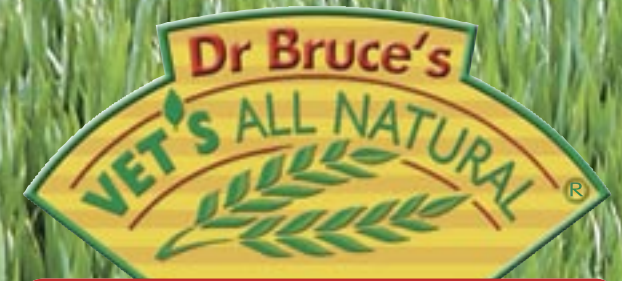

A must in any home pet care kit, the Herbal Wound Spray is Dr Syme's ideal remedy for any open wounds or lacerations, hot spots, moist dermatitis or abscesses. It combines peroxide, aloe vera juice, sea minerals and tea tree oil.

Dry Shampoo

The Dry Pet Shampoo is an excellent alternative to traditional chemical wet shampooing. The product is simply sprinkled on the animal's coat, and brushed in. It will reduce unpleasant odours, and it is ideal for use on cats, who hate being washed.

The Natural Choice for Healthy Pets

The Vets All Natural product range is the result of years of research, investigation and trials by respected Australian veterinarian **Dr Bruce Syme** BVSc (Hons).

Dr Syme is leading the way, along with a growing number of vets who are now advocating the health benefits of a diet based on raw, unprocessed food for dogs and cats.

By combining a healthy diet with natural vitamin, mineral, and modern nutraceutical supplements, Vets All Natural products provide natural relief for the most common pet ailments and diseases.

Complete Mix

Complete Mix is a balanced blend of dried cereals, grains, vegetables, garlic, yeast, kelp, lecithin, sprouted barley grass, and vitamin C.

It is simply soaked in water then mixed with fresh raw meat.

When soaked and mixed with the appropriate ration of meat, Complete Mix becomes a totally balanced, nutritionally complete, natural diet for cats and dogs.

Fed routinely, it will produce exceptional natural health and vigour in pets.

Premium Choice

Premium Choice contains all the benefits of Complete Mix, but is already prepared for you – pre soaked and mixed with fresh meat, in a long life vac pack.

Premium Choice is ideal for the busy pet owner who wants the very best in natural nutrition, but without the fuss of preparing a meal.

Available for Adult dogs, Puppies, Cats and Kittens, and an all new Allerblend for dogs with skin problems.

Medi Treats

Scientifically formulated using all natural ingredients, Medi Treats offer all the fun of rewarding your pet with a tasty treat, combined with additional daily health benefits.

Medi Treats are available for growing puppies, adult dogs, dogs with skin and joint problems, and new shark cartilage “Chews”.

Omega Blend

Omega Blend Oil supplies a potent natural source of Omega 3 and 6 essential fatty acids and vitamins A, D, and E.

Dr Syme believes that deficiency of many of these natural vitamins and fatty acids will contribute to the emergence of allergic tendencies, and an over-reactive immune system.

Omega Blend contains 100% pure, human grade, cold pressed oils. Flax Seed Oil, Shark Liver Oil, Sunflower Oil and Wheat Germ Oil.

Joint Formula

Dr Syme specifically developed Joint Formula to provide nutritional support for ageing, injured or recovering animals with regard to maintaining and assisting repair to damaged joint surfaces, tendons, ligaments, and bone tissues.

Joint Formula contains Shark Cartilage powder, Green Lipped Mussel, Dolomite, Flax Seed meal, Vitamin C, Ginger, Copper, Sulphur, and Boron.

Shark Cartilage

Shark Cartilage powder is a rich natural source of Glucosamine and Chondroitin Sulphate, the naturally occurring building blocks for joint cartilage, joint fluid, and associated joint structures, including tendons and ligaments.

Dr Syme believes that these compounds, when added to the diet, will accelerate repair to any joint damage, and provide protection to joints under heavy workloads.
